Introduction

History

Game Theory's Method

Exemplifying Theory

This Book's Style

Notes

PART 1: GAME THEORY

1 The Rules of the Game

1.1 Definitions

1.2 Dominated and Dominant Strategies: The Prisoners Dilemma

1.3 Iterated Dominance: The Battle of the Bismarck Sea

1.4 Nash Equilibrium: Boxed Pigs, The Battle of the Sexes, and Ranked Coordination

1.5 Focal Points

Notes

Problems

Classroom Game

2 Information

2.1 The Strategic and Extensive Forms of a Game

2.2 Information Sets

2.3 Perfect, Certain, Symmetric, and Complete Information

2.4 The Harsanyi Transformation and Bayesian Games

2.5 Example: The Png Settlement Game

Notes

Problems

Classroom Game

3 Mixed and Continuous Strategies

3.1 Mixed Strategies: The Welfare Game

3.2 The Payoff-Equating Method and Games of Timing

*3.3 Mixed Strategies with General Parameters and N Players: The Civic Duty Game

*3.4 Randomizing Is Not Always Mixing: The Auditing Game

3.5 Continuous Strategies: The Cournot Game

3.6 Continuous Strategies: The Bertrand Game, Strategic Complements, and Strategic Substitutes (newly moved here)

*3.7 Existence of Equilibrium (new)

Notes

Problems

Classroom Game

4 Dynamic Games with Symmetric Information

4.1 Subgame Perfectness

4.2 An Example of Perfectness: Entry Deterrence I

4.3 Credible Threats, Sunk Costs, and the Open-Set Problem in the Game of Nuisance Suits

*4.4 Recoordination to Pareto-Dominant Equilibria in Subgames: Pareto Perfection

Notes

Problems

Classroom Game

5 Reputation and Repeated Games with Symmetric Information

5.1 Finitely Repeated Games and the Chainstore Paradox

- 5.2 Infinitely Repeated Games, Minimax Punishments, and the Folk Theorem
- 5.3 Reputation: The One-sided Prisoner's Dilemma
- 5.4 Product Quality in an Infinitely Repeated Game
- *5.5 Markov Equilibria and Overlapping Generations: Customer Switching Costs
- *5.6 Evolutionary Equilibrium: The Hawk-Dove Game

Notes

Problems

Classroom Game

6 Dynamic Games with Incomplete Information

- 6.1 Perfect Bayesian Equilibrium: Entry Deterrence II and III
- 6.2 Refining Perfect Bayesian Equilibrium: The PhD Admissions Game
- 6.3 The Importance of Common Knowledge: Entry Deterrence IV and V
- 6.4 Incomplete Information in the Repeated Prisoner's Dilemma: The Gang of Four Model
- 6.5 The Axelrod Tournament
- *6.6 Credit and the Age of the Firm: The Diamond Model

Notes

Problems

Classroom Game

PART 2: ASYMMETRIC INFORMATION

7 Moral Hazard: Hidden Actions

- 7.1 Categories of Asymmetric Information Models
- 7.2 A Principal-Agent Model: The Production Game
- 7.3 The Incentive Compatibility and Participation Constraints
- 7.4 Optimal Contracts: The Broadway Game

Notes

Problems

Classroom Game

8 Further Topics in Moral Hazard

- 8.1 Efficiency Wages
- 8.2 Tournaments
- *8.3 Institutions and Agency Problems
- *8.4 Renegotiation: the Repossession Game

- *8.5 State-space Diagrams: Insurance Games I and II
- *8.6 Joint Production by Many Agents: The Holmstrom Teams Model
- *8.7 The Multitask Agency Problem (new)
 - Notes
 - Problems
 - Classroom Game

9 Adverse Selection

- 9.1 Introduction: Production Game VI
- 9.2 Adverse Selection under Certainty: Lemons I and II
- 9.3 Heterogeneous Tastes: Lemons III and IV
- 9.4 Adverse Selection under Uncertainty: Insurance Game III
- *9.5 Market Microstructure
- *9.6 A Variety of Applications
- 9.7 Adverse Selection and Moral Hazard Combined: Production Game VII (new)
 - Notes
 - Problems
 - Classroom Game

10 Mechanism Design and Post-Contractual Hidden Knowledge

- 10.1 Mechanisms, Unravelling, the Maskin Matching Scheme, and the Revelation Principle (new model)
- 10.2 Myerson Mechanism Design
- 10.3 An Example of Post-Contractual Hidden Knowledge: The Salesman Game
- *10.4 The Groves Mechanism
- *10.5 Price Discrimination
- *10.6 Rate-of-Return Regulation and Government Procurement
 - Notes
 - Problems
 - Classroom Game

11 Signalling

- 11.1 The Informed Player Moves First: Signalling
- 11.2 Variants on the Signalling Model of Education
- 11.3 General Comments on Signalling in Education
- 11.4 The Informed Player Moves Second: Screening
- *11.5 Two Signals: The Game of Underpricing New Stock Issues

*11.6 Signal Jamming and Limit Pricing (new model)

*11.7 Countersignalling (new)

Notes

Problems

Classroom Game

PART 3: APPLICATIONS

12 Bargaining

12.1 The Basic Bargaining Problem: Splitting a Pie

12.2 The Nash Bargaining Solution

12.3 Alternating Offers over Finite Time

12.4 Alternating Offers over Infinite Time

12.5 Incomplete Information

*12.6 Setting up a Way to Bargain: The Myerson-Satterthwaite Mechanism

Notes

Problems

Classroom Game

13 Auctions

13.1 Values Private and Common, Continuous and Discrete

13.2 Optimal Strategies under Different Rules in Private-Value Auctions

13.3 Revenue Equivalence, Risk Aversion, and Uncertainty

*13.4 Reserve Prices and the Marginal Revenue Approach (new)

13.5 Common-Value Auctions and the Winner's Curse (new model)

*13.6 Asymmetric Equilibria, Affiliation, and Linkage: The Wallet Game (new)

Notes

Problems

Classroom Game

14 Pricing

14.1 Quantities as Strategies: Cournot Equilibrium Revisited

14.2 Capacity Constraints: The Edgeworth Paradox

14.3 Location Models

*14.4 Comparative Statics and Supermodular Games

*14.5 Vertical Differentiation (new)

*14.6 Durable Monopoly

Notes

Problems

Classroom Game

*A Mathematical Appendix

*A.1 Notation

*A.2 The Greek Alphabet

*A.3 Glossary

*A.4 Formulas and Functions

*A.5 Probability Distributions

*A.6 Supermodularity

*A.7 Fixed Point Theorems

*A.8 Genericity

*A.9 Discounting

*A.10 Risk

References and Name Index

Subject Index

List of Figures

1 The Rules of the Game

- 1 : The Dry Cleaners Game as a Decision Tree
- 2 : The Dry Cleaners Game as a Game Tree

2 Information

- 1 : Follow-the-Leader I in Extensive Form
- 2 : Ranked Coordination in Extensive Form
- 3 : The Time Line for Stock Underpricing: (a) A Good Time Line; (b) A Bad Time Line
- 4 : Information Sets and Information Partitions.
- 5 : Follow-the-Leader II
- 6 : Follow-the-Leader III: Original
- 7 : Follow-the-Leader III: After the Harsanyi Transformation
- 8 : Bayess Rule
- 9 : The Game Tree for the Png Settlement Game

3 Mixed and Continuous Strategies

- 1 : The Payoffs in Patent Race for a New Market
- 2 : Reaction Curves in The Cournot Game
- 3 : Stackelberg Equilibrium
- 4 : Bertrand Reaction Functions with Differentiated Products
- 5 : Cournot vs. Differentiated Bertrand Reaction Functions (Strategic Substitutes vs. Strategic Complements)
- 6 : Continuous and Discontinuous Reaction Functions

4 Dynamic Games with Symmetric Information

- 1 : Follow the Leader I
- 2 : The Tremble Game: Trembling Hand Versus Subgame Perfectness
- 3 : Entry Deterrence I
- 4 : The Extensive Form for Nuisance Suits
- 5 : The Pareto Perfection Puzzle

5 Reputation and Repeated Games with Symmetric Information

- 1 : The Dimensionality Condition
- 2 : Evolutionary Dynamics in the Hawk-Dove- Bourgeois Game

6 Dynamic Games with Incomplete Information

- 1 : Entry Deterrence II, III, and IV
- 2 : The PhD Admissions Game
- 3 : Entry Deterrence V
- 4 : The Interest Rate over Time
- 5 : The Beer-Quiche Game

7 Moral Hazard: Hidden Actions

- 1 : Categories of Asymmetric Information Models
- 2 : The Efficient Effort Level in Production Game I
- 3 : Three Contracts that Induce Effort e^* for wage w^*
- 4 : Shifting Supports in an Agency Model

8 Further Topics in Moral Hazard

- 1 : Insurance Game I
- 2 : Insurance Game II with Full and Partial Insurance
- 3 : More on Partial Insurance in Insurance Game II
- 4 : Contracts in the Holmstrom Teams Model

9 Adverse Selection

- 1 : An Extensive Form for Lemons I
- 2 : Lemons II: Identical Tastes
- 3 : Lemons III: Buyers Value Cars More Than Sellers:
- 4 : Lemons IV: Sellers Valuations Differ
- 5 : Insurance Game III: Nonexistence of a Pooling Equilibrium
- 6 : A Separating Equilibrium for Insurance Game III
- 7 : Curves for Which There is No Equilibrium in Insurance Game III
- 8 : Lemons III When Buyers Value Cars More and the Minimum Quality is Zero

10 Mechanism Design in Adverse Selection and Post-Contractual Hidden Information

- 1 : The Salesman Game with Curves for Pooling Equilibria
- 2 : Indifference Curves for a Separating Equilibrium
- 3 : Linear and Nonlinear Pricing
- 4 : Perfect Price Discrimination
- 5 : The Varian Nonlinear Pricing Game
- 6 : Marginal versus Average Demand
- 7 : Two Depictions of the Single Crossing Property

8 : Why the Expensive Firms Incentive Compatibility Constraint Is Nonbinding

11 Signalling

1 : Education VI: No Pooling Equilibrium in a Screening Game

2 : Education VII: Neither Separating nor Pooling Pure-Strategy Equilibria in a Screening Game

3 : How the Signal Changes with the Variance

4 : Different Ways to Signal a Given Company Value

12 Bargaining

1 : (a) Nash Bargaining Game; (b) Splitting a Pie

2 : Trades in Bilateral Trading II

3 : Trade in the one-price equilibrium

4 : Trade in the linear equilibrium

13 Auctions

1 : Smoothing a Discrete Distribution

2 : The Bid Function in an All-Pay Auction with Identical Buyers

3a : Auctions and Marginal Revenue: Reserve Price Needed

3b : Auctions and Marginal Revenue: No Reserve Price Needed

4 : Extracting Information From Uniformly Distributed Signals

14 Pricing

1 : Different Demand Curves

2 : Multiple Cournot-Nash Equilibria

3 : Rationing Rules when $p_b = 30$, $p_a \leq 30$, and $K = 70$

4 : Location Models

5 : Numerical Examples for Hotelling Pricing

6 : Payoffs in the Hotelling Location Game

7 : Nonexistence of pure strategies with three players

8 : The Equilibrium Mixed-Strategy Density in the Three-Player Location Game

9 : The Equilibrium Mixing Density for Location

10 : Equilibrium versus Efficiency

11 : The Buyers Marginal Benefit per Period in the Game of Durable Monopoly

A Mathematical Appendix

1 : Concavity and Convexity

2 : Upper Semicontinuity

3 : A mapping with three fixed points

4 : Discounting

5 : Mean Preserving Spreads

List of Tables

1 The Rules of the Game

- 1a : The Dry Cleaners Game: Normal Economy
- 1b : The Dry Cleaners Game: Recession
- 2 : The Prisoners Dilemma
- 3 : The Battle of the Bismarck Sea
- 4 : The Iteration Path Game
- 5 : Boxed Pigs
- 6 : The Modellers Dilemma
- 7 : The Battle of the Sexes
- 8 : Ranked Coordination
- 9 : Dangerous Coordination
- 10 A General Prisoners Dilemma
- 11 : An Abstract Game
- 12 : Flavor and Texture
- 13 : Which Game?
- 14 :A Three-By-Three Game

2 Information

- 1 : Ranked Coordination
- 2 : Follow-the-Leader I
- 3 : Information Partitions
- 4 : Information Categories
- 5 : Bayesian Terminology
- 6 : Payoffs A, The Prisoners Dilemma
- 7 : Payoffs B, A Confession Game

3 Mixed and Continuous Strategies

- 1 : The Welfare Game
- 2 : Chicken
- 3 : Grab the Dollar
- 4 : The General 2-by-2 Game
- 5 : 2-by-2 Games with Mixed Strategy Equilibria
- 6 : The Civic Duty Game
- 7 : Pure Strategies Dominated by a Mixed Strategy

- 8 : Auditing Game I
- 9 : A Game for the 1996 Midterm
- 10 : A Takeover Game
- 11 : IMF Aid.

4 Dynamic Games with Symmetric Information

- 1 : Entry Deterrence I
- 2 : Payoffs from Different Policies
- 3 :

5 Reputation and Repeated Games with Symmetric Information

- 1 : The Minimax Illustration Game
- 2 : Prisoners Dilemmas
- 3 : Some repeated games in which reputation is important
- 4 : The Utopian Exchange Economy Game
- 5 : Hawk-Dove: Economics Notation
- 6 : Hawk-Dove: Biology Notation
- 7 : A Benoit-Krishna Game
- 8 : Evolutionarily Stable Strategies
- 9 : Conversation Dynamics
- 10 : Grab the Dollar
- 11 : Grab the Dollar: Dynamics

6 Dynamic Games with Incomplete Information

- 1 : The Prisoners Dilemma
- 2 : Subgame Payoffs in the Expensive-Talk Game
- 3 : The Prisoners Dilemma

7 Moral Hazard: Hidden Actions

- 1 : Applications of the Principal-Agent Model
- 2 : Profits in Broadway Game I
- 3 : Probabilities of Profits in Broadway Game I
- 4 : Profits in Broadway Game II
- 5 : A Moral Hazard Game
- 6 : Output from Low and High Effort
- 7 : Entrepreneurs Selling Out
- 8 : Output Probabilities

- 9 : Output Probabilities
 - 10 : Effort and Outputs
 - 11 : Efforts and Outputs
 - 12 : Bankruptcy
- 8 Further Topics in Moral Hazard
- 1 : Output in the Lucky Executive Game
 - 2 : Crime
 - 3 : More Crime
 - 4 : Bankruptcy
 - 5 : Team output
- 9 Adverse Selection
- 1 : Insurance Game III: Payoffs
 - 2 : Two-Time Losers
- 10 Mechanism Design in Adverse Selection and Post-Contractual Hidden Information
- 1 : The Right To Silence Game payoffs
- 11 Signalling
- 1 : Marriage Values
- 12 Bargaining
- 1 : Alternating Offers over Finite Time
 - 2 : Alternating Offers over Infinite Time
- 13 Auctions
- 1 : Bids by Serious Competitors in Oil Auctions
 - 2 : The Tai-Pan Game
- 14 Pricing
-
- *A Mathematical Appendix
- 1 : Some Useful Functional Forms
 - 2 : Discounting

List of Games (in order of appearance for now)

The Dry Cleaners Game
The Prisoners Dilemma
The Battle of the Bismarck Sea
The Iteration Path Game
Boxed Pigs
The Modellers Dilemma
The Battle of the Sexes
Ranked Coordination
Dangerous Coordination
A Sequential Prisoners Dilemma
Follow-the-Leader I
Follow-the-Leader II
Follow-the-Leader III
The Png Settlement Game
Joint Ventures
The Welfare Game
Chicken
The War of Attrition
Grab the Dollar
The Patent Race for a New Market
The Civic Duty Game
Auditing Game I
Auditing Game II
Auditing Game III
The Swiss Cheese Game
The Cournot Game
The Stackelberg Game
The Bertrand Game
The Differentiated Bertrand Game
Matching Pennies
A Voting Paradox
Alba and Rome
Risky Skating
The Tremble Game
Entry Deterrence I
Nuisance Suits I
Nuisance Suits II
Nuisance Suits III
The Pareto Perfection Puzzle
Repeated Entry Deterrence
The Three-Way Duel
Heresthetics in Pliny and the Freedmens Trial
The Garbage Entry
Voting Cycles
The Chainstore Paradox

The Repeated Prisoners Dilemma
Product Quality
Customer Switching Costs
Hawk-Dove
The Utopian Exchange Economy Game
The Hawk-Dove-Bourgeois Game
Overlapping Generations
Product Quality with Lawsuits
A Benoit-Krishna Game
Repeated Entry Deterrence
Entry Deterrence II
Entry Deterrence III
The PhD Admissions Game
Entry Deterrence IV
Entry Deterrence V
The Gang of Four Model
The Diamond Model
Production Game I
Production Game II
Production Game III
Production Game IV
Production Game V
Broadway Game I
Broadway Game II
The Lucky Executive Game
Repossession Game I
Repossession Game II
Insurance Game I
Insurance Game II
Multitasking I
Multitasking II
Production Game VI
Lemons I
Lemons II
Lemons III
Lemons IV
Insurance Game III
The Bagehot Model
The Kyle Model
Production Game VII
Production Game VIII
The Myerson Trading Game
The Salesman Game
The Streetlight Game
Varians Nonlinear Pricing Game
Procurement I
Procurement II

Procurement III
The Right To Silence Game
Underpricing New Stock Issues
Limit Pricing as Signal Jamming
Countersignalling
Splitting a Pie One-Period Bargaining with Incomplete Information
Two-Period Bargaining with Incomplete Information
Bilateral Trading I
Bilateral Trading II
Bilateral Trading III
Bilateral Trading IV
The Ten-Sixteen Auction
The Continuous-Value Auction
The Dollar Auction
The Uniform-Signal Common-Value Auction
The Wallet Game
The Bertrand Game with Capacity Constraints
The Edgeworth Paradox
The Hotelling Pricing Game
Vertical Differentiation I
Vertical Differentiation II
Vertical Differentiation III
Durable Monopoly Differentiated Bertrand with Advertising
Asymmetric Cournot Duopoly
