

$P(X)$

If I were a fool I

excuse that I

use of otherwise

course, itself

obscured like this,

would write useless

just wanted to

wasted

things like this and plead the feeble

save space in my article by making

white space in this diagram (which is, of

useless in the present paper unless it is humorously

so I guess this sentence is not useless after all). Go

ahead and use more paper if you have something

X

worthwhile to say; that's

what junky white pines from Georgia are planted for, after all.
