The following is a roll-forward of the Company's unrecognized tax benefits.

In millions of dollars	**2010**	2009	2008
Total unrecognized tax benefits at January 1	**$3,079**	$3,468	$3,698
Net amount of increases for current year's tax positions	**1,039**	195	254
Gross amount of increases for prior years' tax positions	**371**	392	252

Foreign exchange, acquisitions and dispositions	**(8)**	10	(104)
Total unrecognized tax benefits at December 31	**$4,035**	$3,079	$3,468

Total amount of unrecognized tax benefits at December 31, 2010, 2009 and 2008 that, if recognized, would affect the effective tax rate are $2.1 billion, $2.2 billion and $2.4 billion, respectively. The remainder of the uncertain tax positions have offsetting amounts in other jurisdictions or are temporary differences, except for $0.8 billion at December 31, 2010, which would be booked directly to *Retained earnings*.

Interest and penalties (not included in the "unrecognized tax benefits" above) are a component of the *Provision for income taxes*.

(1) Includes $9 million for foreign penalties and $4 million for state penalties.

The Company is currently under audit by the Internal Revenue Service and other major taxing jurisdictions around the world. It is thus reasonably possible that significant changes in the gross balance of unrecognized tax benefits may occur within the next 12 months, but the Company does not expect such audits to result in amounts that would cause a significant change to its effective tax rate.

The following are the major tax jurisdictions in which the Company and its affiliates operate and the earliest tax year subject to examination:

Jurisdiction	Tax year
United States	2006
Mexico	2005
New York State and City	2005
United Kingdom	2008
Japan	2005
Brazil	2006
Singapore	2003
Hong Kong	2004
Ireland	2006

Foreign pretax earnings approximated $12.3 billion in 2010, $6.1 billion in 2009 and $9.3 billion in 2008 (of which, $0.1 billion profit, $0.6 billion loss and $4.4 billion profit, respectively, are in discontinued operations). As a U.S. corporation, Citigroup and its U.S. subsidiaries are currently subject to U.S. taxation on all foreign pretax earnings earned by a foreign branch. Pretax earnings of a foreign subsidiary or affiliate are subject to U.S. taxation when effectively repatriated. The Company provides income taxes on the undistributed earnings of non-U.S. subsidiaries except to the extent that such earnings are indefinitely invested outside the United States. At December 31, 2010, $32.1 billion of accumulated undistributed earnings of non-U.S. subsidiaries were indefinitely invested. At the existing U.S. federal income tax rate, additional taxes (net of U.S. foreign tax credits) of $8.6 billion would have to be provided if such earnings were remitted currently. The current year's effect on the income tax expense from continuing operations is included in the "Foreign income tax rate differential" line in the reconciliation of the federal statutory rate to the Company's effective income tax rate.

Income taxes are not provided for the Company's "savings bank base year bad debt reserves" that arose before 1988, because under current U.S. tax rules such taxes will become payable only to the extent such amounts are distributed in excess of limits prescribed by federal law. At December 31, 2010, the amount of the base year reserves totaled approximately $358 million (subject to a tax of $125 million).

The Company has no valuation allowance on deferred tax assets at December 31, 2010 and December 31, 2009.

(1) Pretax.

With respect to the New York NOLs, the Company has recorded a net deferred tax asset of $1.1 billion, along with less significant net operating losses in various other states for which the Company has recorded a net deferred tax asset of $0.6 billion and which expire between 2012 and 2031. In addition, the Company has recorded deferred tax assets in foreign subsidiaries, for which an assertion has been made that the earnings are indefinitely reinvested, for foreign net operating loss carryforwards of $487 million (which expire in 2012–2019) and $60 million (with no expiration), respectively.

Although realization is not assured, the Company believes that the realization of the recognized net deferred tax asset of $52.1 billion is more likely than not based upon expectations as to future taxable income in the jurisdictions in which the DTAs arise and available tax planning strategies, as defined in ASC 740, *Income Taxes*, (formerly SFAS 109) that would be implemented, if necessary, to prevent a carryforward from expiring. Included in the net U.S. federal DTA of $41.6 billion are $4 billion in DTLs that will reverse in the relevant carryforward period and may be used to support the DTA, and $0.3 billion in compensation deductions that reduced additional paid-in capital in January 2011 and for which no adjustment was permitted to such DTA at December 31, 2010 because the related stock compensation was not yet deductible to Citi. In general, the Company would need to generate approximately $105 billion of taxable income during the respective carryforward periods to fully realize its U.S. federal, state and local DTAs.

As a result of the losses incurred in 2008 and 2009, the Company is in a three-year cumulative pretax loss position at December 31, 2010. A cumulative loss position is considered significant negative evidence in assessing the realizability of a DTA. The Company has concluded that there is sufficient positive evidence to overcome this negative evidence. The positive evidence includes two means by which the Company is able to fully realize its DTA. First, the Company forecasts sufficient taxable income in the carryforward period, exclusive of tax planning strategies, even under stressed scenarios. Secondly, the Company has sufficient tax planning strategies, including potential sales of businesses and assets, in which it could realize the excess of appreciated value over the tax basis of its assets. The amount of the DTA considered realizable, however, is necessarily subject to the Company's estimates of future taxable income in the jurisdictions in which it operates during the respective carryforward periods, which is in turn subject to overall market and global economic conditions.

Based upon the foregoing discussion, as well as tax planning opportunities and other factors discussed below, the U.S. federal and New York State and City net operating loss carryforward period of 20 years provides enough time to utilize the DTAs pertaining to the existing net operating loss carryforwards and any NOL that would be created by the reversal of the future net deductions that have not yet been taken on a tax return.

The U.S. foreign tax credit carryforward period is 10 years. In addition, utilization of foreign tax credits in any year is restricted to 35% of foreign source taxable income in that year. Further, overall domestic losses that the Company has incurred of approximately $47 billion are allowed to be reclassified as foreign source income to the extent of 50% of domestic source income produced in subsequent years and such resulting foreign source income is in fact sufficient to cover the foreign tax credits being carried forward. As such, the foreign source taxable income limitation will not be an impediment to the foreign tax credit carryforward usage as long as the Company can generate sufficient domestic taxable income within the 10-year carryforward period. Under U.S. tax law, NOL carry-forwards must generally be used against taxable income before foreign tax credits (FTCs) or general business credits (GBCs) can be utilized.

Regarding the estimate of future taxable income, the Company has projected its pretax earnings predominantly based upon the "core" businesses in Citicorp that the Company intends to conduct going forward. These "core" businesses have produced steady and strong earnings in the past. In 2010, operating trends were positive and credit costs improved. The Company has already taken steps to reduce its cost structure. Taking these items into account, the Company is projecting that it will generate sufficient pretax earnings within the 10-year carryforward period alluded to above to be able to fully utilize the foreign tax credit carryforward, in addition to any foreign tax credits produced in such period. Until the U.S. federal NOL carryforward is fully utilized, the FTCs and GBCs will likely continue to increase. The Company's net DTA will decline as additional domestic GAAP taxable income is generated.

The Company has also examined tax planning strategies available to it in accordance with ASC 740 that would be employed, if necessary, to prevent a carryforward from expiring. These strategies include repatriating low-taxed foreign source earnings for which an assertion that the earnings are indefinitely reinvested has not been made, accelerating U.S. taxable income into or deferring U.S. tax deductions out of the latter years of the carryforward period (e.g., selling appreciated intangible assets and electing straight-line depreciation), accelerating deductible temporary differences outside the U.S., holding onto available-for-sale debt securities with losses until they mature and selling certain assets that produce tax exempt income, while purchasing assets that produce fully taxable income. In addition, the sale or restructuring of certain businesses can produce significant U.S. taxable income within the relevant carryforward periods.

The Company's ability to utilize its DTAs to offset future taxable income may be significantly limited if the Company experiences an "ownership change," as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"). In general, an ownership change will occur if there is a cumulative change in the Company's ownership by "5% shareholders" (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period. A corporation that experiences an ownership change will generally be subject to an annual limitation on its pre-ownership change DTAs equal to the value of the corporation immediately before the ownership change, multiplied by the long-term tax-exempt rate (subject to certain adjustments), provided that the annual limitation would be increased each year to the extent that there is an unused limitation in a prior year. The limitation arising from an ownership change under Section 382 on Citigroup's ability to utilize its DTAs will depend on the value of Citigroup's stock at the time of the ownership change. Under IRS Notice 2010-2, Citigroup did not experience an ownership change within the meaning of Section 382 as a result of the sales of its common stock held by the U.S. Treasury.
